

The virtual job fair can be accessed using a smart phone but it is not the best device to use as some of the content will be too small to see due to the size of the smartphone screen.

If you experience difficulties (you get a message like the one above) when registering or viewing the platform run a system check. The issues are probably due to pop up blockers being disabled and/or the screen resolution and browsers size is too small. Using a pc, laptop or tablet for the event should fix the issue.

System Check

This system check covers standard platform functionality. It does not cover requirements for any 3rd party services that may be integrated into the experience.
